Using aborted baby cells HEK-293

Altimmune

Intranasal vaccine proprietary technology uses aborted baby cells PER.C6

Massachusetts Eye and Ear

AAV Covid Adenovirus vector using aborted baby cells HEK-293

**Lindsley F. Kimball Research Institute, New York Blood Center
and Beijing Institute of Microbiology and Epidemiology**

Uses aborted baby cells HEK-293

Are Vaccines needed?

So-called 'philanthropist' **Bill Gates**—with NO medical qualifications—is telling us that every person in the world needs to be vaccinated before we can resume normal life. But given the world population of 7.8 billion, the calculated **global death rate** from Covid-19 is only **0.01%**. This is of course much lower for people under 80 years of age and don't have serious underlying health problems such as cancer. The **recovery rate** of those who get Covid-19 is almost **98%**. And not one single child without a serious underlying health condition has died of Covid-19 in the UK.

The dangers of 'fast track' Vaccines

A vaccine can take more than **10 years** to fully develop. The discovery and research phase is normally two-to-five years. The speed with which pharmaceutical companies have responded to the coronavirus has been described as **"unprecedented"** by **Dr Jerome Kim**, Director-General of the **International Vaccine Institute**. Doctor Kim stated, "...Vaccine development is characterised by a high failure rate – often 93% between animal studies and registration of a product..." Animal studies are critical for vaccine development. However, vaccines for Covid-19 have bypassed animal studies and gone straight to human trials. In the absence of animal studies, the outcomes in humans cannot be predicted.

It must also be noted that the manufacturers of Covid-19 vaccines could be given full protection from prosecution if they cause death, injury or any harmful side-effects to people who are injected with their vaccines.

Did you know...?

COVID-19 vaccines

are being developed

with cells from

aborted babies

Unborn baby @ 8 weeks

The race is on to find a vaccine for the **Coronavirus (COVID-19)**. But many of these vaccines are being developed using cell lines that were originally derived from tissue of babies killed by abortion in the 1970s and 80s.

Researchers from big pharmaceutical companies to small biotech companies and universities, have been pushing out dozens of vaccine candidates and have **fast-tracked** vaccine candidates to clinical trials in record time. The pharmaceutical companies are sprinting to have a vaccine

ready by the end of the year or by early 2021.

Several COVID-19 vaccine frontrunners, including those being developed by **Moderna, Oxford University/AstraZeneca, CanSino Biologics/Beijing Institute of Biotechnology**, and **Inovio Pharmaceuticals**, are using a human kidney cell line called **HEK-293** to develop their trial vaccines. **HEK-293 was originally derived from kidney tissue taken from a baby girl who was aborted in the Netherlands in 1972.**

Additionally, **Janssen**, the pharmaceutical division of consumer product giant **Johnson & Johnson**, is using the human cell line **PER.C6** to develop its vaccine. **The PER.C6 cell line was derived from eye tissue taken from a baby boy who was aborted in the Netherlands in 1985.**

Will there be Forced Vaccinations?

There is a real danger that COVID-19 vaccines could become compulsory. The '**Coronavirus Act**' passed by the Westminster Parliament grants the Government "emergency powers" to handle COVID-19. The Act outlines the Government has "reasonable", "proportionate" and "necessary" powers - each of which is likely to change over time and is subject to interpretation.

When questioned about mandatory vaccinations, the Government Health Secretary Matt Hancock did not rule out the option that **vaccines would be compulsory.**

What can I do?

Forced vaccinations for COVID-19 would be an infringement of your civil & religious liberties and human rights.

Contact your MP or Assembly Members (MLAs) by logging on to **www.theyworkforyou.com** and tell them you are totally opposed to mandatory vaccinations, and that mandatory vaccinations must not be enforced on the people of Northern Ireland.

Also ask your MP and MLAs to demand the Government stop funding COVID-19 vaccines that are being developed using cell lines from babies killed by abortion.

WHAT THE PHARMACEUTICAL COMPANIES DON'T TELL YOU ABOUT VACCINES...

Although it is not well known or clearly disclosed by pharmaceutical companies, cell lines derived from aborted babies have been used for decades in the development and manufacture of many widely used vaccinations including **measles/mumps/rubella (MMR), rubella, varicella (chickenpox), polio, hepatitis A, rabies, and shingles.**

Vaccines also contain **Mercury** and **Aluminium** - metals that are toxic to the human body. Other ingredients used in vaccines include, **pig blood, horse blood, rabbit brains, dog kidneys, cow hearts, monkey kidneys, chick embryos, calf serum, sheep blood.**
